1. Nature of operations and going concern

Terra Balcanica Resources Corp. (formerly 1250598 B.C. Ltd.) ("Terra" or the "Company") was incorporated on May 19, 2020 under the laws of the Province of British Columbia, Canada. In March 2021, the Company changed its name to Terra Balcanica Resources Corp. Head office is located at 250 – 200 Burrard Street, Vancouver, BC V6C 3L6. The principal business of the Company is the identification, evaluation and acquisition of mineral property assets.

The Company is in the process of exploring its mineral property interests and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable. The Company's continuing operations and the underlying value and recoverability of the amounts shown for mineral property interests are entirely dependent upon the existence of economically recoverable mineral reserves and the ability of the Company to obtain the necessary financing to complete the exploration of the mineral property interests.

These interim condensed consolidated financial statements ("financial statements") are prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of operations. As an exploration stage company, the Company does not have traditional sources of revenue, and historically has relied on advances payable to cover its operating expenses. As at April 30, 2025, the Company had an excess of current liabilities over current assets of \$235,040 (as at January 31, 2025 excess of current liabilities over current assets was \$436,444) and shareholders' equity of \$3,119,896 (January 31, 2025 - \$2,740,099). These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

On May 17, 2024, the Company consolidated its issued share capital on a ratio of two (3) old common shares for every one (1) new post-consolidated common share (the "Share Consolidation"). The current and comparative references to the common shares, weighted average number of common shares, loss per share, acquisitions, stock options and warrants have been restated to give effect to this Share Consolidation.

2. Material accounting policies

(a) Use of estimates and judgments

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of these financial statements and the reported expenses during the period. Actual results could differ from these estimates. The preparation of these financial statements requires management to make judgments regarding the going concern of the Company, as discussed in Note 1.

Deferred tax assets and liabilities

The Company is periodically required to estimate the tax basis of assets and liabilities. Where applicable tax laws and regulations are either unclear or subject to varying interpretations, it is possible that changes in these estimates could occur that materially affect the amounts of deferred income tax assets and liabilities recorded in the financial statements. Changes in deferred tax assets and liabilities generally have a direct impact on earnings in the period that the changes occur. Each period, the Company evaluates the likelihood of whether some portion or all of each deferred tax asset will not be realized. This evaluation is based on historic and future expected levels of taxable income, the pattern and timing of reversals of taxable temporary timing differences that give rise to deferred tax liabilities, and tax planning initiatives.

Impairment of Mineral property interest

The application of the accounting policy for Mineral property interest requires judgment in determining whether it is likely that future economic benefits will flow to the Company. The Company undertakes a review of the carrying values of mineral property interest and related expenditures whenever events or changes in circumstances indicate that their carrying values may exceed their estimated net recoverable amounts.

2. Material accounting policies (continued)*Valuation of share-based compensation*

From time to time the Company may issue a specific number of common shares as compensation for services received where such a transaction did not entail the use of cash. The fair value of share-based payments is estimated using the Black-Scholes option pricing model and rely on a number of estimates, such as the expected life of the option, the volatility of the underlying share price, the risk-free rate of return, and the estimated rate of forfeiture of options granted.

(b) Basis of presentation

These financial statements have been prepared in conformity with International Accounting Standard ("IAS") 34, Interim Financial Reporting, using the same accounting policies as detailed in the Company's annual audited consolidated financial statements for the year ended January 31, 2025, and do not include all the information required for full annual financial statements in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). It is suggested that these financial statements be read in conjunction with the annual audited consolidated financial statements.

These financial statements have been prepared on an historical cost basis, except for financial instruments measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

All amounts on the consolidated financial statements are presented in Canadian Dollars (CDN); the functional currency of the Company is Canadian Dollar (CDN). The Company consolidated the operations of Tera Balkanika Doo Beograd ("Tera Balkanika"), which has a functional currency of the Serbian Dinar ("RSD") and Drina Resources D.O.O. ("Drina"), which has a functional currency of the Bosnian Marks ("BAM").

(c) Basis of consolidation

These financial statements include the accounts of the Company and its subsidiary. The results of each subsidiary will continue to be included in the consolidated financial statements of the Company until the date that the Company's control over the subsidiary ceases. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation. All information presented as at April 30, 2025 and 2024.

Certain pronouncements have been issued by the IASB or IFRIC that are effective for accounting periods beginning on or after January 1, 2025. The Company has reviewed all other updates and determined that many of these updates are not applicable or consequential to the Company and have been excluded from discussion within these material accounting policies.
